

8m - 18m Moog Truck Mounted Platform

UBM 14

The 18m platform is designed for larger bridges and wharves, delivering safe, efficient access where it's needed most. Ideal for rehabilitation works, as well as inspections and investigations on bridges, wharves, and jetties, it accommodates up to four operators and is built for productivity on complex sites. It also provides extended reach for wider multi-lane bridges, making it easier to access central components that are otherwise difficult to reach.

Machine Specs

Max Platform length under bridge	8m - 18 m
Max Platform length alongside bridge	9 m
Max lowering depth	9.5 m
Width of platform	1.4 m
Side walk clearance	2.3 m
Hand rail / Barrier max clearance	2.9 m
Operational footprint	2.5 m
Max load on far end of platform	300 kg
Max load across platform	600 kg
Rotation of platform under bridge	180° degrees
Deployment side	Left and right

Truck Specs

Traveling height (stowed)	3.5 m
Traveling width	2.5 m
Traveling length	12 m
Overall weight (approx)	23,000 kg

m = Metre
kg = Kilogram
